Take A Look Active LLC Sustainability Policy

At Take a Look Active LLC, we are committed to using as much recycled material as possible. and recycling as much of our process waste as possible.

Currently, this takes the form of our shipping materials, boxes and packing material.

Shipping materials::
Boxes are dependent on supplier availability.
Packing materials are that of re-used and or recycled paper packing.
We Shall never purchase plastic materials for packing, however will RE-USE plastics that we received rather than discard it. We strive to keep this to a minimum, as we don't want it.

Product Packaging::
* Hang Tags:
Currently we are using new stock, however later in 2020 we shall switch to a post consumer waste recycled material as our current stock shall run out. Percentage of post consumer waste has yet to be determined. We shall use the largest percentage which allows us to represent the brand in a proper manner. Currently, we are using a white stock, but are evaluating a natural stock with a re-design of said packaging.

** PolyBag sleeve:
Polybag sleeves are the the least desirable item in our packaging, we are looking for an alternative. As of yet, have not found a good substitute that satisfies our goals

Product Materials::
* Brass: Unknown at this time, and is supplier dependent.
* Stainless Steel: Unknown at this time, and is supplier dependent.
* PolyCarbonate Mirror: Unknown at this time, and is supplier dependent. Though is expected to be low due to product requirements of clarity.
* Tygon Tubing: Unknown at this time, and is supplier dependent.

Waste Product::
Our Manufacturing process has little to no waste by weight or by volume, that said there is some of the polycarbonate plastic. This plastic is sent back to the manufacturer for recycling. The current environment dictates whether they will accept waste materials.

* In active Research to determine what the supplier percentages are. Constrained options
** In active research to find a better solution, as polybags are not favored by our policy. Though, at this juncture, a better solution has not presented itself. As soon as one is, we shall actively pursue it.
